Agrifac celebrate world premiere of the new self-propelled sprayer CONDOR and the new sugar beet harvester QUATRO

CONDOR – the new self-propelled sprayer

The new Condor is Agrifac's top model for all spraying operations between planting and harvesting. With a working width up to 51 metres, tank capacity up to 4000 litres, automatic adjustable track width between 150 – 225 cm, ground clearance of 110 cm, four wheel drive and steering, **EcoTronicPlus©**, **StabiloPlus©**, **EcoFlowPlus©** and **High-TechAirPlus©**, this is by far the most **Efficient**, **Economic**, **Ergonomic** and **Ecological** self propelled sprayer for chemicals and fertilizers available on the market.

To the unique redesign of the water system flowing as well as the electronic improvements and a comfortable driving cabine are the new machine equipment.

QUATRO sugar beet harvester – new look, new Design!

Optimum comfort was the key in the development of our new sugar beet harvester – Quatro. This is noticeable from the easily accessible and read-able control panel and monitors in the new cabine, which enables optimum adjustment of the machine and easy maintenance. The excellent weight division of the machine over ist wheels and the position of the wheels ensure an even field after harvesting. Trough a whole range of innovations, such as an automatic steering or electronic speed turbine, will offer you maximum efficiency, easy control and comfort.
