

ONE TRADE FAIR, TWO AWARDS

Exhibitors of AGRITECHNICA and SYSTEMS & COMPONENTS

Innovation Award AGRITECHNICA

To win a Medal for Innovation, an **agricultural machinery product** must represent a new or distinctly improved concept which facilitates the use of new processes or substantially improves already familiar processes.

Decisive criteria:

- Practical significance
- Benefits in profitability and processes
- Benefits to environment and energy use
- Benefits for work load and safety

SYSTEMS & COMPONENTS TROPHY – Engineers' Choice

To win a Trophy, **systems or components** must feature a new or distinctly improved concept that can contribute significantly to developing and realising products which facilitate the use of new processes or substantially improve already familiar processes.

Registration via the Exhibitor Service Portal

An independent expert commission composed of members from science, research and consulting will convene and select the winners.

Information on innovations submitted will be treated in strict confidence and will be viewed only by the expert commission.

Presentation of the winners during AGRITECHNICA 2021 at the Max Eyth Evening.

Registration via the Exhibitor Service Portal

A jury of development engineers from exhibiting agricultural engineering companies will select the award-winners in a two-step process:

Step 1: Pre-selection from all applicants by 20 development engineers from the overall jury: Viewing all documents, technical assessment and nomination of 20 innovations.

Step 2: Selection of the award-winners from the 20 nominated innovations through online voting of the overall jury.

Announcement of the winners in October.
